Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: applicant must provide serial numbers and filing dates of all copending applications. All references to attorney docket numbers must be deleted.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, line 1, applicant should clarify the preamble of the claim. Applicant states that the contact assembly [20] is mounted **in** the electrical switching apparatus. In line 6, it is stated that the housing [of the contact assembly] is resiliently locked to the switching apparatus. Claims 2-5 inherit the defect of the parent claim.

Art Unit: 2832

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Lehman et al. [US 4,774,484].

Lehman et al. disclose a auxiliary contact assembly for an electrical switching apparatus [102] comprising:

- an actuator [110];
- a housing [figure 3];
- an electrical contact system [181, 185, figure 16];
- a pusher [170] selectively actuatable by the actuator to operate the contact system;
- flexible means [104, 104A] for joining the housing to the electrical switching apparatus; and
- locking means [134, column 3, lines 58-67] for resiliently locking the housing to the electrical switching apparatus.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2832

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lehman et al. in view of McGary [US 3,290,628].

Lehman et al. disclose the instant claimed invention except for: the locking means being formed of a mortise and tenon, the specific arrangement of the actuator element relative to the auxiliary switch and the specific arrangement of the locking means on the housing.

McGary discloses a contactor [10] having auxiliary switches attached thereto by means of a (mortise/dovetail)/tenon joint [98, figure 1].

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the (mortise/dovetail)/tenon joint design of McGary for the locking means of Lehman et al. for the purpose of providing a tight lock when the auxiliary switch is attached to the switching apparatus.

Lehman et al. discloses the claimed invention except for the specific positioning of the actuator. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the actuator protrude from the switching apparatus instead of the auxiliary switch, since it has been held that a mere reversal of the essential working parts of a device involves only routine skill in the art. *In re Einstein*, 8 USPQ 167.

Art Unit: 2832

The specific positioning lock types would have been obvious design considerations based on the particular type of switching apparatus used and necessary switching configurations.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
